The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class E airspace, controlled airspace extending upward from 700 feet AGL at Canyon Ranch Airport, Sonora, TX. The development of a VOR/ DME SIAP to RWY 32 has made this proposal necessary. Designated airspace extending upward from 700 feet above the ground is now Class E airspace. The intended effect of this proposal is to provide adequate Class E airspace for aircraft executing the VOR/DME SIAP to RWY 32 at Canyon Ranch Airport, Sonora, TX. The coordinates for this airspace docket are based on North American Datum 83.

Designated Class E airspace areas extending upward from 700 feet or more above ground level are published in Paragraph 6005 of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations that need frequent and routine amendments to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Proposed Revision of Class E Airspace; Venice, LA

AGENCY: Federal Aviation Administration (FAA), DOT. **ACTION:** Proposed rule; withdrawal.

SUMMARY: This action withdraws a Notice of Proposed Rulemaking (NPRM) that proposed to revise the Class E airspace at Venice, LA. The proposal was to revise the controlled airspace

extending upward from 700 feet above the ground (AGL) needed for aircraft executing a Nondirectional Radio Beacon (NDB) standard instrument approach procedure (SIAP) at Tiger Pass Seaplane Base. Since the publication of the NPRM, the Tiger Pass NDB has been decommissioned and the SIAP has been canceled. Therefore, the proposal is withdrawn.

DATES: July 17, 1995.

FOR FURTHER INFORMATION CONTACT: Donald J. Day, System Management Branch, Federal Aviation Administration, Southwest Region, Fort Worth, TX 76193–0530; telephone: (817) 222–5593.

SUPPLEMENTARY INFORMATION:

On November 24, 1993, an NPRM was published in the **Federal Register** (58 FR 62061) to revise the Class E airspace at Venice, LA. The intended effect of the proposal was to provide adequate Class E airspace to contain aircraft executing the NDB SIAP at Tiger Pass Seaplane Base, Venice, LA. After publication of the NPRM, the Tiger Pass NDB, a non-Federal navaid, was abandoned and the SIAP was canceled. Therefore, no need exists to revise the existing Class E airspace at Tiger Pass Seaplane Base, Venice, LA. Accordingly, the proposed rule is withdrawn.
